- Booster Pump  
Packaged System
- Water Distribution Pump  
Packaged System

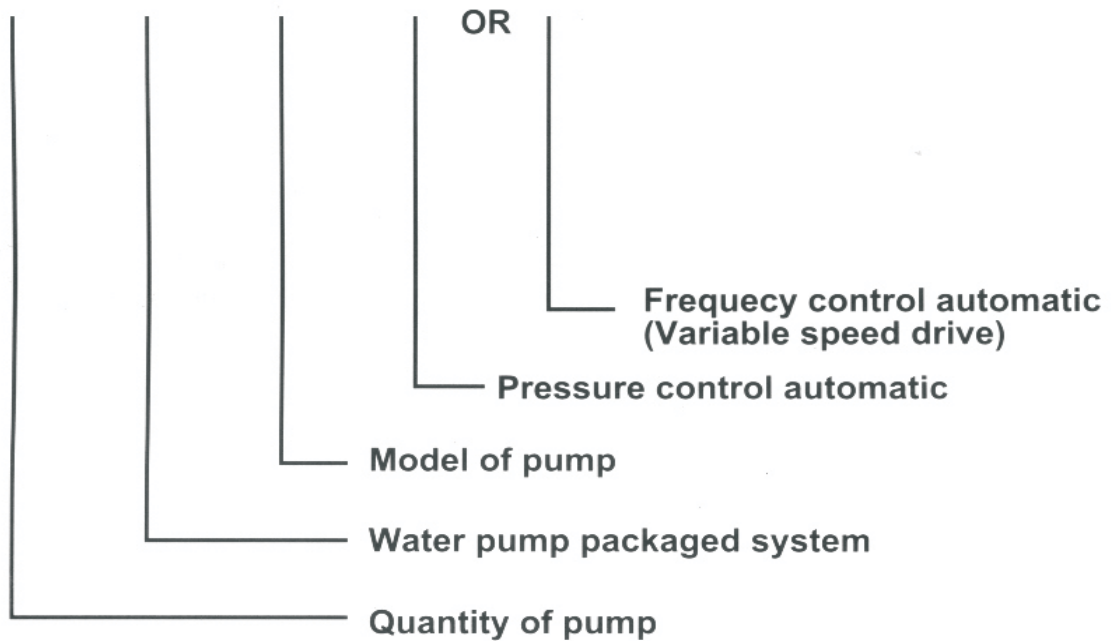

ISO 9001-2008

## WP - series (Water Pump Packaged System)

- ★ **Booster Pump Packaged System**
- ★ **Water Distribution Pump Packaged System**

### FEATURES

#### ★ 2 WP / MH8-20 / PC / FC

As advance water supply equipment ; WP series (Water Pump Packaged System) comprises 1 or more pumps in parallel/single alternate automatically by pressure control or by frequency control automatically by variable speed drive.

Generally, the type of WP series is divided into step control type using pressure switch and variable speed control type ; using variable frequency converter. Especially, variable speed control type is recommended in that it keeps the water pressure constantly by controlling the speed/rpm of pump's motor.
